

BRAZIL

Brazil is the Nearest and Best First Optional Market for US – Florida Companies.

Brazil is an emerging market with the second largest economy in the Americas, besides US and with a Gross Domestic Product (GDP) of around 50% of South America's regional economy. From 2004 to 2009, more than 24 million Brazilians moved out of poverty and another 27 million were incorporated into classes A, B and C. Now is the time to market and gain Brazilian recognition for brands, product, service, companies and even personal qualifications and expertise; according to a recent salary report, executives in Brazil are already making 5% more than executives in US due to high demand for expertise. 2014 World cup and 2016 Olympics will be hosted by Brazil and there are numerous infrastructure projects in process of execution translating into huge opportunities for US entrepreneurs and companies of every size. Brazil is already the number one trading partner for Florida and is the nearest largest economy for US companies' expansion and development. The goal is to help expansion by reaching thousands of people at once and a combined marketing with printed ads, online directory, trade show participation, on-ground support and live person to take call at a local Brazilian phone number and provide the cultural personal touch necessary to generate qualified leads.
